Mohamed Moheyeldin

Forward Deployed Engineer

Reston, VA 20191 | mohamedmoheyeldin.com | mohamedmoheyeldin.jobs@gmail.com | linkedin.com/in/moheyeldin | github.com/mohamedmoheyeldin

Professional profile

Forward Deployed Engineer on a VA healthcare claims platform, with 11 years in software development and quality engineering across federal, banking, and e-commerce. Work directly with stakeholders from first requirements conversations through demos and feedback. Write React features and built Data Generator & File Processing, which gives developers and QA realistic data where production data can't be used.

Professional experience

Booz Allen Hamilton — Washington, DC

Forward Deployed Engineer (FDE) | Dec 2020 – Present

Customer: U.S. Department of Veterans Affairs (VA)

- Work directly with VA stakeholders on a healthcare claims platform: define requirements, lead demos each release cycle since 2022, and join working sessions with claims processors and VA users on production issues.
- Integrate claim-status APIs with health providers so staff, providers, and veterans see live status by role; created a claims framework that notifies the right party so claims keep moving.
- Enabled the team to use Tableau and built custom VA and internal dashboards, now the main view of server health and system status.
- Contribute React, TypeScript, and JavaScript features; trace data issues across frontend, backend, MySQL.
- Built Data Generator & File Processing (used daily; full dev database in under 5 minutes) and a Playwright framework that helps reduce production bugs.

Chick-fil-A Corporate — Atlanta, GA

Software Engineer in Test | Nov 2018 – Dec 2020

- Investigated REST contracts, schemas, and data integration with Postman and reusable JavaScript tooling.
- Connected GitHub Actions with AWS EC2, S3, and Aurora test environments; troubleshot OIDC/Okta authentication and application failures.

Ally Bank — Sandy, UT

Software QA Engineer | Sep 2015 – Nov 2018

- Translated banking requirements into acceptance criteria; used SQL and reproducible Jira reports to investigate data issues and verify releases across QA, UAT, and staging.

Selected project

Portfolio & Career Content System: Built a React/Untitled UI portfolio from validated JSON, with shared PDF/Word generation and static deployment packaging for Cloudflare. mohamedmoheyeldin.com

Technical skills

Application development: React, TypeScript, JavaScript, Java, Reusable components

Data and integration: SQL, MySQL, JSON, REST APIs, Postman, Tableau, SQL Server, Oracle, MongoDB

Delivery and quality: Playwright, GitHub Actions, Git, Jira, Jenkins, AWS EC2/S3/Aurora test environments

AI-assisted engineering: GitHub Copilot, VS Code, GPT models, Claude, Gemini

Education

Bachelor's degree in Computer Science | American College of Commerce and Technology | May 2014

Professional development

Claude Academy | Issued 2026: Introduction to Model Context Protocol; Claude Code in Action; Building with the Claude API

OpenAI Academy | Issued 2026: AI Foundations; Agents and Workflows; Applied AI Foundations; AI Leadership; Apply AI at Work Pathway Completion

Palantir | Issued 2026: Speedrun: Your First End-to-End Workflow; Foundry & AIP Builder Foundations Quiz

Scaled Agile | Issued 2021: Implementing SAFe Course (5.1)
